## AN EXPERT DIAGNOSTIC ASSESSMENT LEADS TO HIGHLY EFFECTIVE TREATMENT

Dr. Mednick uses his specialized training to provide an expert diagnostic assessment for each and every patient. The process is designed to pinpoint the source of your problem and determine the most effective plan of care. In addition to a comprehensive health history and physical examination, Dr. Mednick uses state-of-the-art diagnostic techniques, including:

- **Evoked Potential Tests** – Used to diagnose neurological conditions such as Multiple Sclerosis by evaluating sensory, visual, and auditory functions.
- **Electroencephalogram (EEG)** – Used to diagnose seizure disorders by measuring electrical activity in the brain through application of electrodes placed on the scalp.
- **Electromyography (EMG) & Nerve conduction velocities (NCV)** – Used to distinguish nerve disease (neuropathy) and muscle disease (myopathy) by recording electrical activity within the nerves and muscles.
- **Computer-based neuropsychiatric evaluation** – Provides a more comprehensive and accurate evaluation of the impact of neurologic symptoms than traditional methods.
- **Video electronystagmography (VENG)** – Used to diagnose different causes of dizziness, such as inner ear disorders.

## THE LATEST TECHNIQUES FOR TREATMENT OF NEUROLOGIC CONDITIONS

**Headaches** – Over 45 million Americans suffer from various types of headaches, including migraines and tension-types. Dr. Mednick can help identify the root cause of your headaches and guide you in the appropriate use of medications and other therapies, which can provide significant relief.

### Neurodegenerative Disorders, including Alzheimer's & Parkinson's Disease –

Dr. Mednick provides expert evaluation to determine the cause of memory loss and gait difficulties. He also offers essential guidance on the use of medications to manage these conditions.

**Multiple Sclerosis** – Dr. Mednick will help to determine if your symptoms are due to MS. A number of highly effective treatments are available, including Tysabri®, an infusion (IV) therapy that can significantly reduce the severity of MS flare-ups and slow the progression of MS-related disability. Dr. Mednick works with an experienced registered nurse to safely administer Tysabri® and other similar therapies in the comfort and convenience of his office.

**Seizures/Epilepsy** – You'll find accurate evaluation and expert management for seizure disorders, plus caring and careful guidance in the use of anticonvulsant medications.

**Balance Disorders & Neuropathy** – Whether your condition is caused by diabetes or another medical issue, you'll find complete assessment and care right here. Dr. Mednick provides expert guidance on the most appropriate and effective treatments, including oral medications, infusion therapy and rehabilitation.

## MAINTAINING A STRONG PARTNERSHIP WITH YOU AND YOUR DOCTOR

Dr. Mednick's goal is not to just treat your condition, but to address your unique needs and concerns as well. His genuine compassion and patient-friendly demeanor ensures that you will always feel comfortable with every aspect of your care.

You and your referring doctors will also enjoy:

- Fast, flexible scheduling with urgent health issues handled promptly
- Comprehensive reports provided promptly for referring physicians
- New, modern office conveniently located with plentiful free parking
- Friendly, helpful office staff who will assist you with everything from scheduling studies to filing insurance paperwork.
